

Lab Mat

Reusable, reliable, and reversible

An economical solution to help keep benchtops clean and safe from stains, spills and wear. Save money by eliminating the need for repeated purchases and disposal costs associated with disposable paper mats. The Fisherbrand™ lab mat is made from a durable silicone material that creates a stain resistant washable working surface. When the mat is done being used, it can be easily cleaned using any standard disinfectant by simply wiping it, or putting it in a dishwasher and it's ready for use again. Since the Fisherbrand lab mat is reusable, it helps reduce waste, making it a more environmentally friendly option over the alternative paper mats. It is also autoclavable.

The Fisherbrand lab mat offers a large working surface and is anti-skid, which when dealing with harsh chemicals and delicate glassware, helps keep items in place and prohibits it from sliding out from underneath. The mat's surface is also noise dampening, reducing sound from the vibration of common benchtop equipment. The lab mat can be used with items such as centrifuges, vortex mixers, hot plates, stirrers, pipettes and so much more. When using the mat with magnetic stirrers there is a designated area with internal metal inserts to keep stir bars from wandering around the working surface.

- Made from FDA food grade silicone
- Ideal for every type of laboratory and more specialised areas such as cold rooms, clean rooms, sterile suites and areas where high sterility is a requirement
- Protect bench tops from hot items up to 200°C (392°F)
- Chemical resistance: chemically inert and does not react with most chemicals
- Washable with standard disinfectants in sinks or dishwashers allows for easy clean up during repetitive uses
- Mat can be rolled up for compact storage
- Autoclavable at 121°C for 15 minutes
